

# EU Consortia, Friends, and Me. A tale of collaborations.

Itzhak Mizrahi

Department of Life Sciences

The School of Sustainability & Climate Change

Waste2Fuels has aimed to develop next generation biofuel technologies capable of converting agrifood streams into high quality biobutanol.

The main results achieved are very remarkable in terms of innovation and step-forward the state-of-the-art.

Holoruminant is a multi-actor project aiming to elucidate the role of ruminant-associated microbiomes and their interplay with the host animal in early life and throughout fundamental life events

The 3D'omics project is a multidisciplinary project that aims to reconstruct the animal-microbiota multi-omic interplay in 3D to better understand how animal genomes and microbial metagenomes interact.

# A beginning is the time for taking the most delicate care...

Frank Herbert *Dune* (1965)
